

NEWS FLASH

Effective August 1st, 2009, Universal Controls Group (UCG) and Parker SSD Drives Division are proud to announce the partnership of Universal Controls Group as an authorized Parker SSD Drives System House covering all of Northern Ohio.

Parker SSD DC Drive Family

Universal Controls Group can provide on-site drive service, troubleshooting, start-up assistance and repair for the complete Parker drive line, which includes AC and DC drives and the entire servo product line.

The industrial automation and technology behind Parker SSD Drives unites a high power AC drive with modular architecture and an Integrated Bus System. The design is both compact and industrially rugged.

Universal Controls Group can provide custom engineering for your industrial machinery and distinctive design applications along with control panel construction. We will implement your project from initial concept to start-up.

Discuss with us your ideas and requirements and we will put together a quotation for your review. Contact your salesman for more details.
